

TradesFlow Executive Brief

Field Service Management Built for Trade Businesses

One Platform. Every Trade. Complete Control.

TradesFlow is the all-in-one field service management platform purpose-built for HVAC technicians, plumbers, electricians, roofers, and appliance repair professionals. We don't just manage your business—we help you grow it.

The Three Problems That Cost You Money

1. Lost Customer Information

Spreadsheets, sticky notes, and memory gaps mean lost jobs and frustrated customers. **Every time you can't instantly recall a customer's history, you lose credibility.**

2. Scheduling Chaos

Double-bookings, missed appointments, and endless phone tag waste hours every week. **Poor scheduling can cost a trade business \$20,000+ annually in lost productivity.**

3. Invoice & Follow-Up Failures

Forgetting to send invoices or follow up on quotes means money left on the table. **40% of service quotes never convert due to lack of follow-up.**

Equipment Passport™: Our Signature Differentiator

What if you could remember every detail about every customer's equipment?

The Equipment Passport is a complete digital record of every HVAC unit, water heater, electrical panel, and appliance at your customer's property:

- **Full specifications:** Brand, model, serial number, installation date
- **Warranty tracking:** Never miss an expiration—proactively reach out
- **Photo documentation:** Nameplates, installations, conditions
- **Complete service history:** Every repair, maintenance visit, and inspection logged

Result: When a customer calls, you have the complete story in seconds. You look like a genius.

The Numbers That Matter

Metric	Value
Active Businesses	500+
Jobs Completed	50,000+
Invoices Processed	\$15M+
