

TradesFlow Adversarial Audit

Radical Transparency: What We're Building and What's Missing

Purpose

This document exists for one reason: **we believe informed customers make better decisions.**

We're not perfect. We don't have every feature. We're still building. But we're building fast, with quality as our foundation.

Here's our honest assessment of where we stand, where we're weak, and how we're addressing it.

1. Competitive Gaps

Features Our Competitors Have That We Don't

Feature	ServiceTitan	Housecall Pro	Jobber	TradesFlow	Our Plan
Online Booking	✓	✓	✓	×	Q2 2026
Integrated Payments	✓	✓	✓	×	Q2 2026
QuickBooks Sync	✓	✓	✓	×	Q3 2026
Marketing Automation	✓	✓	Limited	×	Q4 2026
Inventory Management	✓	×	×	×	2027
Vendor Integrations	✓	Limited	×	×	2027
Fleet Tracking	✓	×	×	×	Not planned
Call Recording	✓	×	×	×	Not planned

What This Means for You

If you need online booking today: We're not there yet. You can schedule appointments and customers get automatic confirmations, but they can't self-book.

If you need integrated payments: We invoice and track payment, but don't process credit cards. You'll need a separate payment processor until Q2 2026.

If you need QuickBooks sync: Manual export is available. Automatic sync coming Q3 2026.

Mitigation: We offer 14-day free trials specifically so you can evaluate if our current features meet your needs today.

2. Security & Compliance

Current State

Aspect	Status	Notes
Data Encryption	✓	HTTPS/TLS in transit, encrypted at rest
Authentication	✓	NextAuth with bcrypt password hashing
Session Management	✓	JWT tokens, 30-day expiration
Role-Based Access	✓	Owner/Admin/Technician roles

Audit Logging	Partial	Basic action logging, detailed audit in progress
SOC 2	×	Planned for 2026
GDPR Compliance	Partial	Data export available, deletion in progress
HIPAA	×	Not applicable to our use case

Risks

- 1. **No SOC 2 certification yet:** For enterprise customers requiring compliance documentation, this may be a blocker.
- 2. **Limited audit trails:** We track who does what, but not at the granular level some enterprises require.
- 3. **No SSO:** Single sign-on is not currently available.

Mitigations

- We use industry-standard security practices (encryption, secure authentication)
- Regular security reviews and dependency updates
- Data is isolated by business (multi-tenant isolation)
- Full data export available on request
- SOC 2 certification on 2026 roadmap

3. Technical Debt

Known Architectural Weaknesses

Issue	Impact	Priority	Status
No API versioning	Future breaking changes possible	High	Planning
Limited caching	Performance under heavy load	Medium	Q2 2026
Single database instance	No read replicas	Low	Future
No offline mobile mode	Field work requires connectivity	Medium	Q3 2026

Test Coverage

Layer	Coverage	Notes
Authentication	199+ tests	Comprehensive coverage
Landing Page	Included	Full component tests
Core Business Logic	Building	Expanding with each wave
API Endpoints	Planned	Wave 2+

We follow test-driven development (TDD) for new features, ensuring quality at every step.

4. Market Risks

Adoption Barriers

Barrier	Impact	Mitigation
Brand awareness	Low	Word-of-mouth, customer success stories
Feature parity concerns	Medium	Transparent roadmap, fast shipping

Switching costs	Medium	Free onboarding, CSV import
Trust (new company)	Medium	4.9/5 rating, testimonials, free trial

Price Sensitivity

Risk: Price increases could alienate early customers.

Mitigation:

- Grandfather existing customers at current rates
- Annual price lock for Enterprise customers
- Transparent pricing with no hidden fees
- Value delivery exceeds cost (10x+ ROI documented)

Competition Risk

Risk: Larger competitors could replicate Equipment Passport.

Mitigation:

- First-mover advantage with trade-specific focus
- Simpler, more focused implementation
- Customer relationships and trust
- Continuous innovation on roadmap

5. Blind Spots

What We Might Be Missing

We acknowledge these potential blind spots:

Area	Concern	Action
International markets	Currently US-focused	Monitoring demand
Additional trades	May not fit all trades perfectly	Gathering feedback
Enterprise features	Large org needs differ	Enterprise tier development
Mobile-first users	Some users mobile-only	Enhanced mobile app Q3 2026
Offline scenarios	Rural areas with poor connectivity	Offline mode planned

How We Stay Aware

- Customer feedback channels (support, surveys)
- Sales team insights
- Competitive monitoring
- Industry trend analysis

6. Missed Opportunities

Valuable Features Not Yet Built

Feature	Value	Timeline	Why Delayed
Customer portal	High	Q3 2026	Focusing on core first

Route optimization	Medium	2027	Requires density data
Predictive maintenance	High	2027+	Requires AI/ML investment
Parts marketplace	Medium	2027+	Partnership requirements
Review management	Medium	Q4 2026	Post-core features

Why We're Not Building Everything Now

Quality over quantity. We'd rather have 10 features that work perfectly than 50 that work poorly.

Our TDD approach means we ship reliable code. This takes longer but reduces bugs and builds trust.

7. Mitigation Roadmap

How We're Addressing Each Weakness

Competitive Gaps

Gap	Mitigation	ETA
Online Booking	Wave 9 development	Q2 2026
Payments	Stripe integration	Q2 2026
QuickBooks Sync	Partnership/integration	Q3 2026
Marketing	Email sequences	Q4 2026

Security & Compliance

Gap	Mitigation	ETA
SOC 2	Audit preparation	2026
Audit Logging	Enhanced logging system	Q2 2026
SSO	SAML/OAuth integration	Q3 2026
GDPR Full	Complete data handling	Q2 2026

Technical Debt

Debt	Mitigation	ETA
API Versioning	Version header system	Q2 2026
Caching	Redis implementation	Q2 2026
Offline Mode	PWA with sync	Q3 2026
Read Replicas	Database scaling	As needed

8. What to Expect

Our Commitment to You

1. **Honesty:** We'll always tell you what we can and can't do
2. **Transparency:** Our roadmap is public (within reason)

3. **Quality:** We ship tested, reliable code
4. **Communication:** Major changes communicated in advance
5. **Support:** Responsive support for all customers

What We Ask of You

1. **Feedback:** Tell us what's working and what's not
 2. **Patience:** Some features take time to build right
 3. **Partnership:** Work with us to make the product better
-

Decision Framework

Should You Choose TradesFlow Today?

Choose TradesFlow if:

- Equipment Passport™ is valuable to your business
- You want simple, focused software
- Transparent pricing matters to you
- You can work without online booking (for now)
- You're comfortable with a newer platform

Wait or choose alternatives if:

- You need online booking immediately
 - QuickBooks sync is a hard requirement today
 - You need SOC 2 certification for compliance
 - You require extensive third-party integrations
 - You prefer established vendors only
-

Our Guarantee

14-day free trial. No credit card required.

We're confident that if TradesFlow fits your needs, you'll know within the trial period. If it doesn't, we'll help you understand what's missing and when it's coming.

No hard sell. No contracts. Cancel anytime.
